

BRADKEN® - London, cast steel machining based in London Ontario, has an immediate position available for a Melter.

Candidate will report to the Foundry Manager and will have overall responsibility for melting and processing all grades of steel made at our foundry. The Melter is responsible for the proper maintenance and upkeep of all melting equipment.

Essential functions of the job will include the ability to run the induction furnaces, preparing charges from raw materials, charging the material into furnaces, pouring into ladles and pouring metal from ladles to moulds.

Candidate must be able to read and write proficiently, possess good oral communications skills and basic knowledge of chemistry. Candidate will have at least high school level math and at least one previous chemistry class, high school or college level.

Applications close October 9th, 2009

Salary: Commensurate with experience, includes great benefits and RRSP. Eligible for overtime.

Please send resumes to:
